Subject: Mariager Salt Specialties A/S EcoVadis rating 2025

Dear Customer,

As a responsible supplier of specialty salt products, Mariager Salt Specialties A/S takes great pride in its sustainability record.

We are pleased to share the results of our 2025 EcoVadis reassessment. This year, we received a **“Bronze”** rating with **70 points**, compared to 71 points last year. While the numerical change is small, it reflects the continued progress driven by our upgraded sustainability policies and programs.

It is important to highlight that EcoVadis significantly tightened its scoring model and medal thresholds in recent years, making it more challenging for companies globally to maintain previous medal levels. In 2024, EcoVadis raised the percentile requirements for all medals, and from 2025 onward, the methodology was further strengthened with more detailed indicators and stricter evidence expectations. As a result, even companies like ours—whose sustainability performance continues to improve—may experience shifts in medal status due to external methodology changes and rising global performance standards, rather than a decline in sustainability efforts.

Despite these evolving assessment conditions, our 2025 result still places us within the **top 35%** of all rated companies worldwide, reaffirming our strong position and motivating us to reach an even higher level where we believe we belong.

We remain committed to a sustainable future and continue to work actively on reducing our environmental footprint while delivering products that provide premium sustainability benefits for our customers.

As a valued customer of Mariager Salt Specialties A/S, we welcome any feedback on our sustainability performance and remain at your disposal for any questions or suggestions.

Sincerely,

Rickard Hedin
Managing Director Nordics
